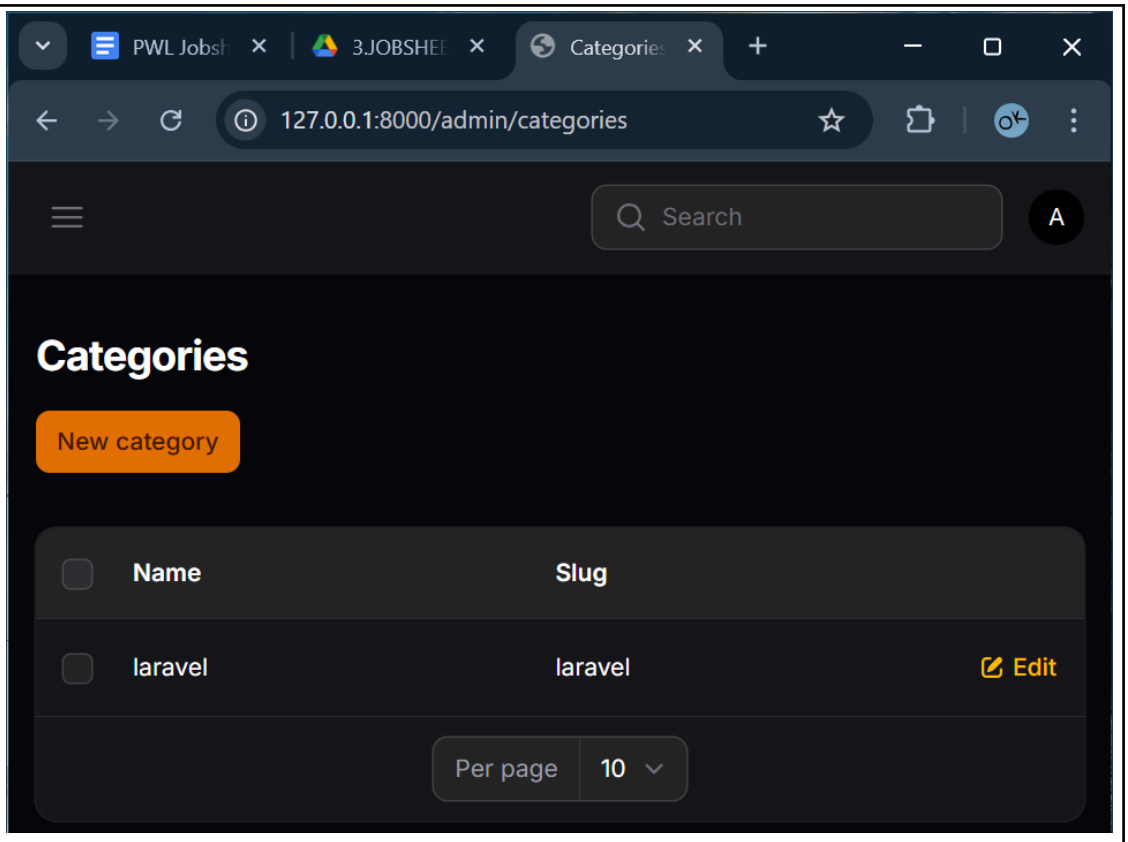
8	 PWL Jobsh 3.JOBSHEE Create Cat 127.0.0.1:8000/admin/categories/create Search A Create Category Name* laravel Slug* laravel Create Create & create another Cancel

Praktikum Ke-2

Langkah	Jawaban/Deskripsi
1	**Mengapa Perlu `$fillable`?** **`$fillable` adalah sistem keamanan (Mass Assignment Protection) yang menentukan kolom mana saja yang boleh diisi secara masal via array (seperti `User::create($request->all())`), guna mencegah user jahat menyisipkan data ke kolom sensitif (misal: `is_admin`).**
2	**Fungsi `$casts` pada Laravel**

	`$casts` berfungsi untuk mengonversi otomatis tipe data dari database ke tipe data PHP yang kita inginkan, contohnya mengubah string `"true"` menjadi boolean `true`, atau string tanggal menjadi objek `Carbon/Datetime`.
3	**Perbedaan Integer vs. Foreign Key** • **Integer: Tipe data angka standar untuk menyimpan nilai numerik biasa (seperti stok atau umur).** • **Foreign Key: Integer khusus yang berfungsi sebagai penghubung (relasi) ke kolom ID di tabel lain, guna menjaga integritas antar data.**
4	**Jika Category Dihapus tapi Masih Ada Post** **Hasilnya bergantung pada pengaturan Constraint di migrasi database kamu:** • **`onDelete('cascade')`: Semua Post yang terkait akan ikut terhapus otomatis.** • **`onDelete('set null')`: Kolom `category_id` di tabel Post akan berubah menjadi `NULL` (kosong).** • **`onDelete('restrict')`: Database akan menolak penghapusan Category selama masih ada Post yang menggunakannya (Error).**

Soal Praktikum

Langkah	Jawaban/Deskripsi
